Education

Indian Institute Of Information Technology, Una Una, Himachal Pradesh, India
Bachelor of Technology, Computer Science and Engineering *September 2023 - Present*

Projects

CodeCritic | *React, Node.js, Express, MongoDB, Tailwind CSS, Groq API* May 2026

Live Project: code-critic-six.vercel.app
GitHub: github.com/karunya666/CodeCritic

- Architected a distributed AI code review pipeline using Groq's LLaMA 3.3 70B, processing concurrent multi-language requests across 10+ languages with real-time Big-O complexity analysis and async error handling.
- Engineered Monaco Editor integration with AI-driven language auto-detection, implementing stateless request handling for concurrent review sessions and improving developer productivity by 30%.
- Designed MongoDB-backed session persistence layer with AI-generated titles, read-only replay, and user-scoped deletion, supporting 100+ concurrent multi-session workflows with optimized query indexing.
- Deployed fault-tolerant full-stack system on Vercel (React/Vite) and Render (Node.js/Express) with Clerk JWT authentication, Svix webhook sync, and Helmet/CORS hardening for production-grade security compliance.

Intervo | *React, Node.js, Express, MongoDB, Stream.io, Groq API* February 2026 - March 2026

Live Project: intervo-realtime.vercel.app
GitHub: github.com/karunya666/Intervo

- Built an all-in-one interview platform co-locating live video/chat (Stream.io), collaborative Monaco Editor, and real-time code execution (JDoodle API), eliminating screen-sharing overhead.
- Implemented host-controlled session management that automatically created a dedicated Stream channel for each interview, supporting 75+ curated DSA problems and reducing setup time by 30 seconds per session
- Integrated AI Resume Builder using Groq's LLaMA 3.3 70B, generating ATS-optimized LaTeX resumes tailored to SDE, Frontend, Backend, and Full-Stack roles.
- Secured REST APIs with Clerk JWT middleware and deployed React/Vite on Vercel and Node.js/Express on Render with MongoDB Atlas.

Achievements

- Solved 500+ problems of **DSA** and **CP** on coding platforms, Leetcode, GeeksforGeeks and CodeChef.
- Attained maximum **rating 1522** in Leetcode contests, Leetcode solving more than 400 problems.
- Cleared **JLPT N5** (Japanese Language Proficiency Test) with **94.0 percentile**; studied through **JLPT N4** level.

Technical Skills

Web Dev (Front End): HTML, CSS, Tailwind CSS, JavaScript, TypeScript, ReactJS, NextJS

Web Dev (Back End): NodeJS, ExpressJS, MongoDB, Python

Libraries and Frameworks: ReactJS, ExpressJS, Mongoose, Monaco Editor, Stream.io, Inngest, Axios, LangChain

Tools & Platforms: Git, GitHub, Vercel, Render, Clerk, Groq API, GenAI

Academic Coursework: C, C++(CPP), DBMS, OOP, OS, CN, DSA

Leadership Experience

Event Coordinator of Battle of Bands - MRIDANG 2025 (Annual cultural fest of IIIT Una)

- Led end-to-end execution of a 300+ attendee music competition, coordinating 4+ volunteer teams across stage, technical, and operations functions.
- Managed artist logistics and vendor negotiations, securing all college administration approvals 2 days ahead of schedule, cutting procurement delays by 25%.
- Streamlined cross-team communication, ensuring zero-delay event delivery and a 90% attendee satisfaction rate.
